INTRODUCTION

The *Compendium of Systems Which Support RCRA and CERCLA* is designed to respond to today's emphasis on data integration and public access of environmental data. The Compendium enables the user to identify systems which support Resource Conservation and Recovery Act (RCRA) and Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). The Compendium is produced by the Information Management staff of the Office of Solid Waste and Emergency Response (OSWER) and is designed to support OSWER activities such as regulatory development, risk assessment, program management, and status reporting.

The Compendium is a hard copy and abbreviated version of the PC-based Windows on Waste (WOW) system which provides search and retrieval functions.

The Compendium consists of three sections:

- ✓ System Descriptions
- ✓ Entity Descriptions
- ✓ Indices

System Descriptions

The systems are listed alphabetically by acronym or abbreviated version of the system name. The acronym is given first and underneath it, a longer, more descriptive name. Then, whenever available, the following items of information are given:

- Current version number.
- Date the version became operational.
- Organization responsible.
- Name and phone number for a person to contact for more information about the system.
- Narrative description of the system.
- Law or authority governing the system.
- List of keywords associated with the system.
- List of entities associated with the system.
- Additional comments about the system.

Entities

An *entity* is a person, place, thing, concept, or event that is of interest to an enterprise. An entity is something about which we store data. Examples of entities are: Waste Site, Contract, and Employee.

The entities are listed in alphabetical order by entity name and a brief description follows. Related entities are listed along with the nature of the relationship and the system in which the relationship is made.

Entities are listed for a subset of the systems.

Indices

System Acronyms are grouped by:

- Organization responsible for the system in Index 1.
- Entities associated with the system in Index 2.
- Keywords associated with the system in Index 3.

Windows on Waste Software

Windows on Waste is available on diskette as a read only, PC-based directory that allows access and search capabilities for over 100 information systems and databases. WOW is designed to allow users to find information on specific KEYWORDS, SYSTEMS, ORGANIZATIONS, and ENTITIES associated with RCRA and Superfund and the relationships that exist among them.

Computer Requirements are:

- ✓ An IBM 286 or better PC
- ✓ A minimum of one Megabyte of disk space
- ✓ A 1.2 Megabyte Floppy drive (for installation)
- ✓ 475K of free memory
- ✓ DOS 3.30 or higher

The *Windows on Waste User Guide* provides detailed instructions on the capabilities of the system and the information contained at each level of the application.

For more information on Windows on Waste, please contact the OSWER Information Management Staff at (202) 260-6760.

CARD CLP ANALYTICAL RESULTS DATA BASE

Current Version: 1
Version Date: 10/01/88

Organization: OSWER/OERR/HSED
Contact: DAVID ENG
Phone: 703-603-8827

Description: THE CONTRACT LABORATORY PROGRAM (CLP) IS EPA'S MAJOR VEHICLE FOR OBTAINING CHEMICAL ANALYSES OF SAMPLES FROM SUPERFUND SITES. SINCE 1980, CLP LABORATORIES HAVE ANALYZED HUNDREDS OF THOUSANDS OF SAMPLES AND GENERATED MILLIONS OF PAGES OF HARD COPY DATA. IN ADDITION TO THE PROBLEMS CAUSED BY THE SHEER VOLUME OF PAPER, THE DATA ARE STORED IN REGIONAL AND/OR SITE-SPECIFIC FILES, MAKING IT DIFFICULT TO ACCESS INDIVIDUAL SAMPLE RESULTS AND ANALYZE NATIONAL AND REGIONAL TRENDS. TO SOLVE THIS PROBLEM, THE CLP ANALYTICAL RESULTS DATABASE (CARD) WAS DEVELOPED TO PROVIDE AN AUTOMATED MEANS OF ACCESSING CLP DATA. DEVELOPED IN JANUARY 1988, CARD PROVIDES VALUABLE INFORMATION USED TO SUPPORT CLP PROGRAM MANAGEMENT AND OTHER ACTIVITIES. THE PROVISION OF A READILY ACCESSIBLE, AUTOMATED DATABASE EXPEDITES THE FLOW OF ANALYTICAL AND ENVIRONMENTAL INFORMATION WITHIN SUPERFUND, ENABLING MORE EFFICIENT UTILIZATION OF THIS DATA.

CARD CURRENTLY CONTAINS THE ANALYTICAL RESULTS OF CLP ROUTINE ANALYTICAL SERVICES (RAS) ORGANIC AND INORGANIC ANALYSES AND THEIR CORRESPONDING QUALITY ASSURANCE/QUALITY CONTROL (QA/QC) DATA ALONG WITH SITE INFORMATION, LOCATION, AND SAMPLING. THE ANALYTICAL RESULTS DATA INCLUDE AN IDENTIFICATION AND CONCENTRATION VALUE FOR EACH HAZARDOUS SUBSTANCE FOUND IN EACH SAMPLE ANALYZED BY THE CONTRACT LABORATORY, ALONG WITH PERTINENT PHYSICAL DESCRIPTIONS SUCH AS SAMPLE MATRIX AND WEIGHT OR VOLUME. QA/QC DATA INCLUDE THE RESULTS OF LABORATORY PROCEDURES THAT ENSURE INSTRUMENT, LABORATORY, AND METHOD PERFORMANCE (E.G. CALIBRATION STANDARDS, BLANKS, MATRIX SPIKES). ALSO INCLUDED IN CARD ARE THE RESULTS OF CONTRACT COMPLIANCE SCREENING (CCS) WHICH DETERMINES THE COMPLETENESS OF THE DATA AND VERIFIES QA/QC COMPLIANCE WITH STANDARDS SPECIFIED IN THE CONTRACT.

THE DATABASE IS CURRENTLY BEING EXPANDED TO INCLUDE SIMILAR INFORMATION FROM DIOXIN, LOW-CONCENTRATION ORGANIC AND INORGANIC, AND QUICK TURNAROUND METHOD (QTM) ANALYSES. IN THE FUTURE, CARD WILL ALSO INCORPORATE ADDITIONAL INFORMATION TO ENHANCE THE USABILITY OF SUPERFUND ANALYTICAL DATA. ADDITIONAL INFORMATION MAY INCLUDE DATA REVIEW QUALIFIERS, SITE-SPECIFIC INFORMATION, SAMPLING INFORMATION, GEOGRAPHIC SAMPLE LOCATORS, AND SPECIAL ANALYTICAL SERVICES (SAS) DATA.

THE DATA ARE OBTAINED FROM THE LABORATORY ON FLOPPY DISKETTE, WHICH IS CONTRACTUALLY REQUIRED FOR ALL CLP ANALYSES. AFTER CCS QUALIFIERS ARE ADDED, THE DATA ARE UPLOADED TO THE IBM MAINFRAME AT THE NATIONAL COMPUTER CENTER (NCC) IN RESEARCH TRIANGLE PARK (RTP), NORTH CAROLINA, AND APPENDED TO CARD. THE DATA ARE STORED AND

MANIPULATED IN THE NATURAL/ADABAS ENVIRONMENT, WHICH PROVIDES A FLEXIBLE AND COMPREHENSIVE CAPABILITY FOR MEETING DATA MANAGEMENT REQUIREMENTS. SIX LEVELS OF SECURITY EXIST TO ENSURE DATA INTEGRITY. ACCESS AND RETRIEVAL OF THE DATA IS ORGANIZED BY SUBSYSTEM AND FUNCTION THROUGH MENU-DRIVEN CARD LIBRARIES. USERS ARE ABLE TO ENTER THE SYSTEM, RETRIEVE INFORMATION, AND PROCESS THE DATA AS REQUIRED. REPORTS MAY BE PRODUCED USING CARD'S MENU SYSTEM OR USER-SPECIFIED REPORTS MAY BE GENERATED USING THE BATCH RETRIEVAL SYSTEM. IN ADDITION, DATA EXTRACTIONS CAN BE ORGANIZED TO PROVIDE DATA INTEGRATION WITH OTHER COMPUTER SYSTEMS AND PC APPLICATIONS SUCH

CERCLA & RCRA RELATED SYSTEMS

AS COMPUTER-AIDED DATA REVIEW AND EVALUATION (CADRE) SOFTWARE.

CARD IS USED TO FACILITATE MANAGEMENT OF THE CLP AND IMPROVE THE UTILIZATION OF CLP DATA IN SUPPORT OF SUPERFUND ACTIVITIES. THE CURRENT AUTHORIZED USER POPULATION FOR CARD IS COMPRISED OF SUPERFUND DATA USERS IN HEADQUARTERS AND REGIONAL OFFICES AND SUPERFUND CONTRACTORS. A LIST OF PRIMARY APPLICATIONS INCLUDES THE FOLLOWING: ANALYTICAL DATA RETRIEVAL BY REGIONAL WASTE MANAGEMENT DIVISIONS AND CONTRACTORS FOR SITE DECISION-MAKING; RETRIEVAL OF DATA FOR REGIONAL DATA REVIEW USING CADRE; OVERSIGHT OF CLP LABORATORIES BY REGIONAL AND HEADQUARTERS PERSONNEL; QC RESULTS STUDIES; AND TREND ANALYSIS FOR METHODS DEVELOPMENT AND REFINEMENT.

Comments: IN THE FUTURE, THE CARD SYSTEM WILL INCORPORATE ADDITIONAL INFORMATION THAT WILL ENHANCE THE USABILITY OF CLP DATA FOR SUPERFUND AND OTHER EPA PROGRAMS. CARD WILL ALSO BE LINKED WITH OTHER EPA DATABASES SUCH AS THE GEOGRAPHICAL INFORMATION SYSTEM (GIS) TO PROVIDE VALUABLE SUPPLEMENTAL INFORMATION. ACCESS WILL BE EXPANDED TO INCLUDE ADDITIONAL EPA PERSONNEL AND, POTENTIALLY, TO PRIVATE INDIVIDUALS WHO HAVE A NEED FOR SUPERFUND DATA. POTENTIAL APPLICATIONS INCLUDE THE FOLLOWING: GEOGRAPHICAL MAPPING OF CONTAMINANTS AT A SITE THROUGH GIS; SUPPORT FOR RISK ANALYSES, EXPOSURE ASSESSMENTS, AND ENVIRONMENTAL IMPACT ASSESSMENTS; TREND ANALYSIS FOR A VARIETY OF NATIONAL, REGIONAL, AND SITE-SPECIFIC PROJECTS, PRELIMINARY SITE CHARACTERIZATION; AND COMPARISON OF SIMILAR SITES TO DESIGN EFFECTIVE CLEANUP TECHNOLOGIES.

Phone: 703-308-8877

Description: HYPERVENTILATE IS USER-FRIENDLY SOFTWARE THAT CAN HELP YOU USE VAPOR EXTRACTION (SOIL VENTING) TECHNOLOGY. THIS SOFTWARE GUIDES THE USER THROUGH A STRUCTURED THOUGHT PROCESS THAT INVOLVES:

- IDENTIFYING AND CHARACTERIZING REQUIRED SITE-SPECIFIC DATA.
- DECIDING IF SOIL VENTING IS APPROPRIATE TO A SPECIFIC SITE.
- EVALUATING AIR PERMEABILITY TEST RESULTS.
- CALCULATING THE MINIMUM NUMBER OF VAPOR EXTRACTION WELLS NEEDED.
- ILLUSTRATING HOW THE RESULTS AT A SPECIFIC SITE MIGHT DIFFER FROM THE IDEAL CASE.

HYPERVENTILATE WILL NOT COMPLETELY DESIGN YOUR VAPOR EXTRACTION SYSTEM, TELL YOU EXACTLY HOW MANY DAYS IT SHOULD BE OPERATED, OR PREDICT THE FUTURE. HYPERVENTILATE IS BOTH AN EDUCATIONAL TOOL FOR THE NOVICE ENVIRONMENTAL PROFESSIONAL AND A FUNCTIONAL TOOL FOR MORE EXPERIENCED USERS. IT PERFORMS NECESSARY CALCULATIONS AND CONTAINS "HELP CARDS" THAT DEFINE THE EQUATIONS USED, MAKE NECESSARY UNIT CONVERSIONS, AND GIVE SUPPLEMENTARY INFORMATION ON RELATED TOPICS. IN ADDITION, HYPERVENTILATE CONTAINS A LIST OF 62 COMPOUNDS THAT CAN BE UPDATED BY THE USER TO A MAXIMUM OF 400 COMPOUNDS.

Description: THE INTEGRATED RISK INFORMATION SYSTEM (IRIS) DATA BASE, DEVELOPED BY THE U.S. ENVIRONMENTAL PROTECTION AGENCY (EPA), IS EPA'S PRIMARY VEHICLE FOR COMMUNICATION OF CHRONIC NON-CANCER AND CANCER HEALTH HAZARD INFORMATION FOR OVER 500 SUBSTANCES. THIS INFORMATION IS SUMMARY IN NATURE, REPRESENTING AGENCY CONSENSUS POSITIONS FOLLOWING COMPREHENSIVE REVIEW BY INTRA-AGENCY WORK GROUPS. IRIS IS A RESOURCE THAT POINTS THE USER TO THE UNDERLYING HUMAN AND/OR ANIMAL DATA USED TO SUPPORT THE AGENCY'S POSITION.

THE SYSTEM CONTAINS HAZARD IDENTIFICATION AND DOSE-RESPONSE INFORMATION BUT DOES NOT INCLUDE EXPOSURE ASSESSMENT INFORMATION. THE DATA IN IRIS, COMBINED WITH SPECIFIC EXPOSURE INFORMATION, CAN BE USED TO HELP CHARACTERIZE THE PUBLIC HEALTH RISKS OF A GIVEN SITUATION. THIS RISK CHARACTERIZATION CAN THEN SERVE AS INPUT FOR A RISK MANAGEMENT DECISION DESIGNED TO PROTECT PUBLIC HEALTH.

IRIS USERS ARE CAUTIONED THAT QUANTITATIVE RISK ESTIMATES ARE SUBJECT TO VARYING DEGREES OF UNCERTAINTY AND THAT THE EXISTENCE OF SUCH UNCERTAINTY SHOULD BE TAKEN INTO ACCOUNT IN PREPARING SITE SPECIFIC RISK ANALYSIS. WHILE THE DATA BASE IS UPDATED MONTHLY TO REFLECT INTRA-AGENCY WORK GROUP DECISIONS, IN SOME CASES NEW HEALTH HAZARD DATA MAY HAVE BEEN GENERATED ON A PARTICULAR SUBSTANCE SINCE AN ON-LINE FILE WAS REVIEWED BY THE WORK GROUPS. THESE DATA MAY NOT YET BE REFLECTED ON THE SYSTEM AND SHOULD BE CONSIDERED IN DEVELOPING RISK CHARACTERIZATIONS.

QASPER QUALITY ASSURANCE SAMPLING PLAN FOR ENVIRONMENTAL RESPONSE SYSTEM

Current Version: 4.0
Version Date: / /

Organization: OSWER/OERR/ERD
Contact: WILLIAM A. COAKLEY
Phone: 908-906-6921

Description: QASPER IS A PC-BASED SOFTWARE PACKAGE WHICH COMPILES GENERIC TEXT AND USER-PROVIDED, SITE-SPECIFIC INFORMATION INTO A DRAFT QUALITY ASSURANCE/QUALITY CONTROL (QA/QC) SAMPLING PLAN FOR THE REMOVAL PROGRAM. QASPER ADDRESSES THE NINE SECTIONS OF A QA/QC SAMPLING PLAN, AS SPECIFIED IN OSWER DIRECTIVE 9360.4-01, QA/QC GUIDANCE FOR REMOVAL ACTIVITIES, SAMPLING QA/QC PLAN, AND DATA VALIDATION PROCEDURES (APRIL 1990, EPA/540/G90/004).

THE ON-SCENE COORDINATORS (OSCs) OR THE TECHNICAL ASSISTANCE TEAM (TAT) CONTRACTORS ARE THE PRIMARY USERS OF QASPER. THESE INDIVIDUALS WILL HAVE ACCESS TO THE SITE-SPECIFIC INFORMATION AND SAMPLING OBJECTIVES THAT CHARACTERIZE THE SITE. THEY ARE ALSO THE ONES RESPONSIBLE FOR ASSEMBLING THAT INFORMATION INTO AN ACCEPTABLE GAME PLAN FOR IMPLEMENTATION.

QASPER WAS CREATED TO FACILITATE THE TIMELY ASSEMBLY OF A COMPREHENSIVE SAMPLING PLAN FOR EMERGENCY RESPONSE ACTIONS. BY THOROUGH CONSIDERATION AND ATTENTION TO THE NECESSARY REQUIREMENTS OF QA/QC SAMPLE PLANNING THROUGH AN AUTOMATED PROCESS, IT IS ANTICIPATED THAT RELIABLE, ACCURATE, AND QUALITY DATA WILL BE GENERATED TO MEET THE INTENDED USE.

QASPER RUNS ON AN IBM PC OR 100 PERCENT COMPATIBLE, WITH A HARD DRIVE, 640K RAM, AND A PRINTER (FOR HARD COPY OUTPUT).

QASPER FEATURES:

- REQUIRES NO OTHER SOFTWARE FOR SUPPORT. A WORD PROCESSING PACKAGE IS INCLUDED WITH THE QASPER PROGRAM.
- GENERATES ASCII OUTPUT IN BOTH FILE AND HARD COPY FORMATS. FILES MAY BE UPLOADED TO OTHER WORD PROCESSING PACKAGES FOR FURTHER MANIPULATION.
- CREATES A HARD COPY QA/QC SAMPLING PLAN READY FOR APPROVAL SIGNATURES AND IMPLEMENTATION.
- RETAINS DATABASE FILES ON ALL PREVIOUS SAMPLING PLANS CREATED. THIS ALLOWS FOR FUTURE MANIPULATION OF AN EXISTING PLAN WITHOUT HAVING TO RECREATE THE DOCUMENT OR SEARCH FOR A SIMILAR SAMPLING PLAN BY LOCATION, FACILITY TYPE, OR CONTAMINANT.
- IMPROVES THE CONSISTENCY AND COMPREHENSIVENESS OF SAMPLING PLAN CREATION EFFORTS THROUGHOUT THE OFFICE, REGION, OR ZONE BY PROMPTING THE USER TO CONSIDER THE SAME SET OF QUESTIONS FOR EACH SITE TO BE ADDRESSED.
- IMPROVES EFFICIENCY FOR CREATING AND REVIEWING QA/QC SAMPLING PLAN DOCUMENTS BY ALLOWING EASY MODIFICATION OF THE DOCUMENT TEXT EITHER THROUGH THE EDITOR OR THROUGH THE WORD PROCESSING PACKAGE.
- PICKS UP INFORMATION THAT HAS REPETITIVE USE IN THE PLAN AND IMPORTS THE INFORMATION TO ALL SECTIONS AFTER THE FIRST ENTRY, THUS AVOIDING REDUNDANT DATA ENTRY.
- PROVIDES THE USER WITH ACCESS TO STANDARDIZED GENERIC TEXT IN VARIOUS SECTIONS OF THE PLAN. BASED ON THE USER'S NEEDS, THIS

CERCLA & RCRA RELATED SYSTEMS

TEXT MAY BE IMPORTED DIRECTLY OR MAY BE EDITED TO FIT THE
SITE-SPECIFIC CONDITIONS.

- HAS FLEXIBLE DATA ENTRY THROUGHOUT PLAN GENERATING ACTIVITIES
AND INFORMS THE USER AS TO WHICH SECTIONS ARE COMPLETE AND WHICH
SECTIONS REQUIRE ADDITIONAL INFORMATION.

Current Version: 3.0.0
Version Date: 12/24/91

Organization: OSWER/OSW/CABD
Contact: KEVIN PHELPS
Phone: 202-260-4697

Description: **SYSTEM OVERVIEW:**
EPA'S OFFICE OF SOLID WASTE (OSW) MAINTAINS RCRIS AS THE NATIONAL PROGRAM MANAGEMENT AND INVENTORY SYSTEM OF RCRA HAZARDOUS WASTE HANDLERS. HANDLERS CAN BE CHARACTERIZED AS FITTING ONE OR MORE OF THE FOLLOWING CATEGORIES: TREATMENT, STORAGE AND DISPOSAL FACILITIES (TSDF) AND LARGE QUANTITY GENERATORS (LQG), SMALL QUANTITY GENERATORS (SQG) AND TRANSPORTERS. RCRIS CAPTURE IDENTIFICATION AND LOCATION DATA FOR ALL HANDLERS, AS WELL AS COMPLIANCE AND ENFORCEMENT INFORMATION IF ACTIONS HAVE TAKEN PLACE THERE. IN ADDITION, TO TSDF'S, RCRIS TRACKS PERMITTING/CLOSURE/POST-CLOSURE PROGRAM ACTIVITIES, AS WELL AS CORRECTIVE-ACTION ASSESSMENTS AND REMEDIATION.

KEY BACKGROUND DOCUMENTS:
RCRA HAZARDOUS WASTE INFORMATION MANAGEMENT EXECUTIVE SUMMARY, U.S. EPA, OFFICE OF SOLID WASTE AND EMERGENCY RESPONSE, EPA530-S-92-001, JANUARY 1992. THIS DOCUMENT IS A BRIEF SUMMARY OF THE RCRIS AND ANOTHER EPA DATABASE, THE BIENNIAL REPORTING SYSTEM WHICH CONTAINS INFORMATION ON HAZARDOUS WASTE GENERATION AND MANAGEMENT.

REPORTING REQUIREMENTS AND OTHER DATA SOURCES:
RCRA SUBTITLE C REGULATIONS TYPICALLY REQUIRE FACILITIES TO SUBMIT A NOTIFICATION OF REGULATED ACTIVITY TO THE STATE OR REGION DEPENDING UPON WHICH HAS RESPONSIBILITY FOR PROGRAM IMPLEMENTATION. IN ADDITION, TSDF'S WHO ARE APPLYING FOR A PERMIT MUST SUBMIT PART A AND PART B FORMS WHICH IDENTIFY IN GREATER DETAIL THE NATURE OF THEIR ACTIVITIES. BEYOND THE DATA OBTAINED FROM THESE FORMS, THE MAJORITY OF INFORMATION IN RCRIS IS PROVIDED BY STATE AND REGIONAL PROGRAM OFFICES, AND IS OBTAINED THROUGH SUCH ACTIVITIES AS ON-SITE INSPECTIONS.

THE MAIN COMPONENTS OF RCRIS ARE THE MODULES CORRESPONDING TO THE PRIMARY AREAS OF PROGRAM ACTIVITY: HANDLER IDENTIFICATION, PERMIT/CLOSURE/POST-CLOSURE, COMPLIANCE MONITORING AND ENFORCEMENT, AND CORRECTIVE ACTION.

OSWER SYSTEMS INVENTORY UPDATE

The OSWER Information Management staff maintains the descriptions of systems and databases in an information repository called the Windows on Waste (WoW) System. This system is available for general use on a PC and has search capabilities. In addition, a hard copy *Compendium of Systems Which Support RCRA and CERCLA* is also maintained.

You can help promote data sharing in the RCRA and Superfund programs by providing an accurate description of systems and databases for which you have responsibility. With the current emphasis on data integration and public access, especially with reference to environmental data, it is important to identify the systems and databases that support the hazardous waste programs.

This appendix contains the OSWER Systems Inventory Data Collection Instructions and Data Collection Form. The Data Collection Instructions contain definitions and examples for each item on the Data Collection Form. Please use the instructions as a reference for completing each item.

The OSWER System Inventory uses the following terminology. A *system* is defined as an organized set of functions, data, procedures, hardware, software, communications, and/or documentation that enables an organization to solve a specific information management problem. A *database* is defined as a collection of interrelated data stored together with controlled redundancy to serve one or more systems or applications.

To complete all items on the Data Collection Form, you may need to research the more technical aspects of your system and its databases.

If you would like to know more about how you can benefit from the OSWER Systems Inventory and WoW, please contact the EPA Information Management Staff at (202) 260-6760.

Please return the completed form to:

OSWER Systems Inventory Data Collection Instructions

- System Name** Full English name assigned to the System by an Organization. The name should clearly reflect the type of information that the System contains and/or the programmatic function that it supports.
- Example:* Comprehensive Environmental Response Compensation and Liability Information System, Version 2.
- System Alias** Name other than previously listed by which a System is known. These may include older names of the System that have been updated, differences in terminology between offices or groups, or any other name or acronym used to refer to the System that are not specifically addressed in another attribute.
- Example:* CERCLIS
(Alias for the Comprehensive Environmental Response Compensation and Liability Information System, Version 2)
- ICR Number** Number which identifies an Agency requirement for data collection from the public. The requirement is subject to the Paperwork Reduction Act, and must be reviewed and approved by the Office of Management and Budget. For more information, call David Schwarz of OPPE (202) 260-2706).
- Example:* 1234
- Contact Name** Name of the EPA person who has custodial or project management responsibility for the System.
- Example:* Mike Cullen
(The contact for the CERCLIS system)

Contact Phone Current telephone number (including area code) of the EPA person who has custodial or project management responsibility for the System.

Example: (202) 603-8730
(The contact's phone for the CERCLIS system)

**EPA Organization/
Division/Branch** The Office, Division, and Branch (and Section, if applicable) of EPA that has management responsibility for the System (use up to 60 characters).

Example: OSWER/OERR/OPM/MSS
(The organization/division/branch responsible for CERCLIS)

Life Cycle Stage Code indicating the stage of the System in the system life cycle as defined by the OSWER System Life Cycle Management Guidance (Directive 9028.00).

Acceptable values are:

- 1 Initiation - An information management problem is being defined and a decision to commit resources to address the problem is decided.
- 2 Concept - High-level functional and data requirements related to an information management problem are created, along with a comprehensive model of a solution to meet the requirements.
- 3 Definition - Specific, detailed functional and data requirements of the system are determined.
- 4 Design - Detailed specifications for the system to meet the functional and data requirements are created.
- 5 Development - The system is ready for acceptance testing and suitable for implementation.
- 6 Implementation - The system has been fully tested, and contains the data needed at start-up.
- 7 Production - The system is available to users, and required changes and enhancements are made to ensure that the system addresses the information management problem in a cost-effective manner.

- 8 Evaluation - A determination of whether the system is effectively meeting the stated requirements, is operating efficiently, and is effectively managed is being decided.
- 9 Archive - The operation of the system is terminated in an orderly, planned manner, ensuring that software and data are properly archived or incorporated into other systems.

Example: 7 [Production]
(The life cycle stage of CERCLIS)

Date System Created The date that the System initially entered the production stage. The date may be listed in YYYYMMDD format.

Example: 19880115 [for January 15, 1988]
(The date created for CERCLIS)

Version Number Number indicating the version of the System. The version number should start at 1 for the initial release of the System and increase each time the system is revised.

Example: 3
(The version number for CERCLIS)

Date Version Created The date the current version of the System entered production stage. The date may be listed in YYYYMMDD format.

Example: 19900410 [for April 10, 1990]
(The date version created of CERCLIS)

Security The security classification scheme is based on the "EPA Information Security Manual -- 1989 Edition." The classification is related to the relative vulnerabilities to EPA's security objectives of Availability, Integrity, and Confidentiality. Degrees of vulnerability, e.g., High, Medium, and Low, are based on risk assessments conducted according to the Manual.

Availability - The degree (High, Medium, Low) to which the loss of the information would cause serious problems, either because it would be costly to replace the information or because it would be difficult to function without the information.

Availability involves both the dollar value and the time value (or criticality) of the information.

Integrity - The degree (High, Medium, Low) to which accuracy and reliability of the information and applications are of particular concern. Integrity is mainly concerned with protecting information from corruption.

Confidentiality - The degree (High, Medium, Low) to which the disclosure of information would be undesirable or unlawful.

Example:

Availability: H [high]
Integrity: H [high]
Confidentiality: H [high]

Law/Authority

Statutory authority for the collection of the information contained in the System.

Example: Law #: Public Law 96-510
Title: Comprehensive Environmental Response,
Compensation, and Liability Act of 1980
(The law/authority title regarding CERCLIS)

Access for Input

Identifies how data is input into the system on a routine basis.

Acceptable values are:

- 1 Batch - The system inputs data into the database as sets of records.
- 2 Interactive - The system inputs data into the database one record at a time.
- 3 Batch and Interactive - The system inputs data into the database through both batch and interactive means.
- 4 Other - The system inputs data into the database via means other than batch or interactive.

Example: 3 [batch and interactive]
(How CERCLIS loads data into CERHELP)

Access for Output Identifies how data is queried from the system on a routine basis.

Acceptable values are:

- 1 Batch - The system retrieves data from the database as sets of records.
- 2 Interactive - The system retrieves data from the database one record at a time.
- 3 Batch and Interactive - The system retrieves data from the database through both batch and interactive means.
- 4 Other - The system retrieves data via means other than batch or interactive means.

Example: 3 [batch and interactive]
(How CERCLIS retrieves data from CERHELP)

System Keywords Lists the codes for the appropriate system keywords. The keywords describe the purpose of the System and the types of data it contains. See the following section for a listing of keywords and corresponding codes. Choose as many codes as needed.

Example:

| <u>Keywords:</u> | <u>Codes:</u> |
|------------------|--|
| DST70 | DBMSS |
| DSS05 | 10,000 to 100,000 data records |

System Description An accurate, concise, and unique narrative expression of the programmatic meaning of the System. An existing system description may be attached.

Example:

The CERCLA Information System (CERCLIS) Version 2.0 supports EPA headquarters and regions for the management and oversight of the Superfund program. CERCLIS serves two purposes: to maintain an automated inventory of abandoned, inactive, or uncontrolled hazardous waste sites and to act as the vehicle for the regions to report to headquarters on the status of

major stages of clean-up at sites. A CERCLIS hotline supports CERCLIS V2.0 operations at headquarters and regional program offices. CERCLIS V2.0 provides a decentralized national system where each region controls and enters its respective data on regional systems.

(The system description for CERCLIS)

Other Information Any additional information about the System entry to be recorded. This attribute should be narrative and contain information about any subject that relates to the System, including the programming language and Data Base Management System used in System development.

Example: Cerclis V1.0 was phased out in January 1988.
CERCLIS V2.0 is developed in System 2000.
(Other information for CERCLIS)
